

Rakan Tahineh

Python Developer & Machine Learning Developer

tahainahrakan@gmail.com | github.com/tahainahrakan | YouTube: @roadtoai_official

PROFILE

Self-taught Python developer building machine learning systems and AI applications with Python — from data preprocessing and model training to deployment. My goal is to pursue advanced studies in Artificial Intelligence and contribute to the development of practical AI systems that solve real-world challenges.

EDUCATION & CERTIFICATIONS

- **Grade 11 Student** — Current average ~95%, expected graduation 2027
- **Python Programming** — Certified
- **Django Web Framework** — Certified

TECHNICAL SKILLS

ML / AI	Scikit-learn, PyTorch (learning)
Languages	Python, JavaScript, SQL
Web / Backend	Flask, Django, HTML/CSS
Data Tools	Pandas, NumPy, Matplotlib, Jupyter
Other	Git/GitHub, model deployment, ML web integration

PROJECTS

UAE Car Price Predictor

Python, Flask, Scikit-learn, Pandas, NumPy — github.com/tahainahrakan/uae-car-price-prediction

- Machine learning web app that estimates UAE used-car prices from brand, model, year, mileage and engine size.
- Trained Linear Regression and Random Forest models, blended into a weighted ensemble (MAE ~39,700 AED).
- Full pipeline: cleaning, feature engineering, training, evaluation, Flask deployment; 7,200+ listings, 100 brands, 716 models.

CURRENTLY BUILDING & LEARNING

- **UFC Fight Outcome Predictor** — machine learning project (in progress).
- **AI Club** — founding an AI club at school (launching Grade 12).
- **Road to AI** — founder of a YouTube channel on machine learning and AI.
- **ML Specialization**, Coursera — in progress.
- **Learning**: PyTorch, Deep Learning, Neural Networks.
